Education

Savitribai Phule Pune University

Bachelor of Engineering in Computer Science

Sep. 2023 – May 2027

GPA: 8.9/10

Technical Skills

Languages: C++, Python, SQL

Data Engineering: ETL, Data Warehousing, Data Modeling, Data Pipelines, Data Transformation

Big Data: Apache Spark, PySpark

AWS: Amazon S3, AWS Glue, Glue Crawler, EBS, RDS, Lambda, Amazon Athena

Databases: SQL Server, MySQL

Data Analysis: Pandas, NumPy, Matplotlib

Tools: Linux, Git, GitHub, VS Code, Jupyter Notebook

Coursework: DSA, DBMS, Operating Systems, OOP, Computer Networks

Projects

Spotify Data Engineering Pipeline | AWS, PySpark, SQL, S3, Glue, Athena

GitHub

- Engineered an end-to-end **AWS data pipeline** using S3, Glue, PySpark, and Athena to ingest, transform, and analyze Spotify datasets.
- Developed **PySpark ETL workflows** to join Artist, Album, and Track datasets, clean data, and generate a consolidated analytical dataset stored in **Parquet with Snappy compression**.
- Implemented **Glue Crawler and Data Catalog** for schema discovery and metadata management, and performed SQL analytics using **Amazon Athena**.

SQL Data Warehouse & Analytics Project | SQL Server, ETL, Data Modeling, Git

GitHub

- Designed and implemented a scalable **Data Warehouse** using **Medallion Architecture (Bronze, Silver, Gold)** to integrate ERP and CRM sales data.
- Built end-to-end **ETL pipelines** in SQL Server for data ingestion, cleansing, transformation, and standardization.
- Developed a **Star Schema** with fact and dimension tables, stored procedures, and data quality checks for analytical reporting.

Student Performance Data Analysis | Python, SQL, Pandas, NumPy, Matplotlib

GitHub

- Developed a **Python and SQL-based analytics system** to process student academic and attendance datasets and generate performance insights.
- Performed **data analysis and visualization** using Pandas, NumPy, and Matplotlib to identify performance trends and top-performing students.
- Built subject-wise performance metrics and automated analytical reports to support **data-driven academic evaluation**.

PassGuard | Python, MySQL

GitHub

- Developed a **secure password management system** using Python and MySQL for credential storage and retrieval.
- Implemented **password hashing, encryption, and CRUD operations** to enhance credential security and management.
- Designed a normalized **relational database schema** for efficient and secure data storage.

Certifications

Databricks

Jan. 2026

Get Started with Databricks for Generative AI

HackerRank

SQL Certificate – SQL Queries, Joins & Aggregations

Edunet Foundation

Sep. 2024

Green Skills and Artificial Intelligence

Udemy

Python for Absolute Beginners – Python Fundamentals
