Education

Savitribai Phule Pune University

Bachelor of Engineering in Computer Science

Sep. 2023 – May 2027

GPA: 8.9/10

Technical Skills

Languages: C++, Python, SQL,
Data Analysis: SQL, Pandas, NumPy, Matplotlib
Data Engineering: ETL, Data Warehousing, Data Modeling
Databases: SQL Server, MySQL
Technologies/Frameworks: Linux, Git, GitHub, Apache Spark
Developer Tools: VS Code, Jupyter Notebook

Projects

SQL Data Warehouse & Analytics Project | *SQL Server, ETL, Data Modeling, Git*

GitHub

- Designed and implemented a modern **Data Warehouse** using the **Medallion Architecture (Bronze, Silver, Gold)** to integrate ERP and CRM sales data.
- Developed end-to-end **ETL pipelines** in SQL Server to ingest, cleanse, standardize, and transform business datasets.
- Built a dimensional model using **fact and dimension tables** with a **Star Schema** optimized for reporting and analytics.
- Created stored procedures, views, and data quality validation checks to automate data loading and ensure consistency.
- Generated analytical insights on customer behavior, product performance, and sales trends through SQL-based reporting.

Student Performance Data Analysis Project | *Python, SQL, Pandas, NumPy, Matplotlib*

GitHub

- Built a Python-based analytics system to process and analyze student academic and attendance datasets using SQL.
- Performed data analysis and generated visual reports to identify performance trends, top performers, and academic insights.
- Developed subject-wise performance metrics and automated reporting workflows using Python and Matplotlib.
- Implemented a modular database-driven architecture to support data-driven academic evaluation and decision-making.

PassGuard | *Python, SQL*

GitHub

- Developed a secure password management system using Python and MySQL for encrypted credential storage.
- Implemented password hashing and encryption with CRUD operations for secure password management.
- Designed and optimized a relational database schema to ensure efficient and secure data retrieval.

Certifications

Edunet Foundation

Sep 2024

Green Skills and Artificial Intelligence

- Explored Artificial Intelligence applications and sustainable technology practices.

HackerRank

SQL Certificate

- Demonstrated proficiency in SQL queries, joins, aggregations, filtering, and database concepts.

Udemy

Python for Absolute Beginners

- Learned Python fundamentals including data types, loops, functions, and object-oriented programming concepts.

Databricks

Jan 2026

Get Started with Databricks for Generative AI

- Completed introductory training on Generative AI concepts and Databricks platform fundamentals.
